

RoGO

RoGO Mission

Provide reliable, secure, life-saving technology in cellular denied areas

What It Is

- Satellite-enabled device that transmits location, local weather, & alerts
- IoT enabler when connected to sensors via bluetooth, LoRA, or cellular

What It Does

- Identifies, marks, & tracks non-human resources
- Reads local temperature, relative humidity, & barometric pressure
- Collects, transmits, & displays vital scene information & emergency communications
- Provides bi-directional data connectivity
- Streamlines communication where radios & phones don't work
- Improves situational awareness & strategic coordination
- Eliminates the need for paper delivery of IAPs & timesheets
- Reduces time spent driving by fatigued first responders

Who Needs It

- | | | |
|----------------------------------|--------------------------|----------------|
| • Wildland firefighting | • Department of Wildlife | • Telemedicine |
| • Disaster response | • Forest Service | • Military |
| • Water utilities | • Environmental sensing | • Agriculture |
| • Electrical grid work | • City, State, Federal | • Logistics |
| • Office of Emergency Management | Government | • OTR trucking |

RoGO Fire

Fighting Wildfires With Intelligence In Cellular-denied Areas

The RoGO Fire DropBlock sends & receives data from anywhere to anywhere.

DropBlocks are satellite enabled devices that...

- Mark, track, & share real-time locations of Fire Engines, Bulldozers, & WaterTenders so ICP has situational awareness via their RoGO portal
- Relay localized weather information to Firefighters & IMET from onboard sensors
- Provide real-time data & warnings to Firefighters & Incident Command
- Improve communication & asset coordination across tactical teams
- Deliver data anywhere in the world
- Allow faster & safer decision-making
- Eliminate the need to hand deliver IAPs & timesheets
- Turn your Kestrel™ into an IoT device to monitor current & historical PIG & FDFM from the RoGO portal
- Save lives, structures, natural resources, & taxpayer funds

RoGO DropBlocks provide information & communication access in remote, cellular-denied areas.
